**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this

Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sanger 2192817 in view of Sargis 4135788.

These claims stand rejected as discussed in the previous office action.

***Response to Arguments***

3. Applicant's arguments filed 8/29/03 have been fully considered but they are not persuasive.

Applicant has argued that the patent to Sanger does not teach the reflector to be omnidirectional (being hemispherical and multi-faceted), instead stating that the reflector is "in the form of a circular bull's-eye."

However, in fig. 2 Sanger clearly shows the reflector to be approximately hemispherical, with fig. 3 showing the reflector to be multi-faceted. It should be noted that "hemispherical" in the claims is being interpreted as encompassing *approximately* hemispherical, since the reflector shown in applicant's drawings is clearly not a perfect hemisphere. Thus, Sanger's reflector satisfies the claimed shape for the reflector. Since the claimed structural features of the reflector are satisfied by the reference, it is seen that Sanger's reflector is "omnidirectional" in a similar manner as the approximately hemispherical, multi-faceted reflector of the present invention, since Sanger's reflector is capable "of being seen from 'omnidirections' or multiple directions" (as stated on p. 2 of the response). Accordingly, the rejection is still deemed to be valid.

#### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action

Art Unit: 2872

is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
